Memorandum for the record

NRO REVIEW COMPLETED

29 June 1964

MEMORANDUM FOR THE RECORD

**SUBJECT: DNRO Presentation on Satellite Systems to
USIB on 18 March 1964**

The Director, NRO, appeared before USIB on 18 March 1964 to describe the then current NRO program for satellites directed toward all objectives. The following notes were taken by the undersigned and represent the available record of that meeting.

McMillan Pitch

I. Present Systems

A. General Search

1. CORONA J

- a. 2 24" fl. cam. full stereo.
- b. 140 nm swath.
- c. 4.5 10° sq. mi./four days.
- d. 10-13' resolution at 100 nm.
- e. 8 days operation - repetitive coverage.

2. Improvements

- a. Resolution-thermal, vibration studies
lower orbits for higher resolution targets.
- b. Coverage-Extended deactivate period
higher orbit required.
